

Docket No. 111219

Application No. 09/994,816

substrate starting with a composition which is most difficult to be phase separated after the layer is formed.

3. (Twice Amended) ~~A-The~~ manufacturing method for an organic electro-luminescent device according to claim 1, further including the step of, during two continuous cycles of discharging said compositions, performing the subsequent discharging of a composition ~~being performed~~ after the composition discharged in a first cycle are dried.

4. (Amended) ~~A-The~~ manufacturing method for an organic electro-luminescent device according to claim 3, ~~the method comprises~~ further including the steps of, prior to said ~~process step~~ for forming a light emitting layer, forming pixel electrodes corresponding to a plurality of pixel regions and banks separating said pixel regions above said substrate; forming a hole injection/transport layer above said pixel electrodes of said plurality of pixel regions; and after said process for forming a light emitting layer, forming a counter electrode above said light emitting layer.

5. (Twice Amended) An organic electro-luminescent device ~~which is~~ manufactured by the manufacturing method according to claim 1.

6. (Amended) An electronic equipment, ~~which is provided with an~~ comprising ~~the organic electro-luminescent device according to claim 5.~~

7. (Amended) ~~A-The~~ manufacturing method for an organic electro-luminescent device according to claim 2, further including the step of, during two continuous cycles of discharging said compositions, performing the subsequent discharging of a composition ~~being performed~~ after the composition discharged in a first cycle are dried.

Docket No. 111219

Application No. 09/994,816

8. (Amended) An organic electro-luminescent device ~~which is manufactured by~~  
the manufacturing method according to claim 2.
